DETAILED ACTION

1. The instant claims are drawn to patentably distinct compounds. Should applicant traverse on the ground that the compounds are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the compounds to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

1-287. Claims 1-21, drawn to mycobacterial serine/threonine protein kinase inhibitor selected from group of compounds 1-287 and method of use using compound selected from compounds 1-287, classified in class 424, subclass 248.1.

288R¹ to 288R¹⁷. Claims 16-22 and 23, drawn to mycobacterial serine/threonine protein kinase inhibitor compound selected from one each of the variables R¹ to R¹⁷, classified in class 424, subclass 248.1.

The inventions are distinct, each from the other because of the following reasons:

Each of the compounds are structurally and patentably distinct.

Because these inventions are distinct for the reasons given above, and because while the searches may overlap, the searches are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
